PROFESSIONAL SUMMARY

Senior Flutter Developer with 5+ years of experience engineering and scaling production Android and iOS applications. Expert in white-label architecture for EdTech and LMS (Learning Management System) platforms, managing a centralized codebase that successfully powers 176+ distinct client configurations and 100+ live applications. Proven track record in designing zero-touch CI/CD pipelines, robust mobile security, real-time architectures, and delivering high-performance, seamless offline capabilities. Adept at navigating complex technical requirements to build resilient infrastructure suitable for both high-growth startups and large-scale enterprise platforms.

TECHNICAL SKILLS

Flutter & Dart:	Flutter, Dart, Provider, ChangeNotifier, Streams, ValueNotifier, CustomPainter
Architecture:	White-Label & Multi-Tenant Systems, Modular & Clean Architecture, Repository Pattern
CI/CD & DevOps:	GitHub Actions, Fastlane, Shorebird OTA, App Store Connect, Google Play Console, Flavors
Networking & Real-Time:	REST APIs, WebSockets, Laravel Reverb, Pusher, Interceptors, Multipart Uploads
Security:	SPKI/SSL Certificate Pinning, freeRASP/Talsec, Secure Storage, R8/ProGuard, Anti-Screen-Capture
Media & Offline:	HLS, media_kit, VdoCipher DRM, Hive, Offline Sync, Local HTTP Server, Bash/Python Automation

PROFESSIONAL EXPERIENCE

VClasses Senior Flutter Developer	Jan 2021 – Aug 2026
White-Label Scalability & Production Impact: Spearheaded the architectural design of a massive white-label EdTech/LMS platform, successfully deploying and managing 100+ production iOS and Android apps (including apps serving 11K+ active users) from a single unified Flutter codebase. Architecture & Multi-Tenancy: Engineered a scalable configuration system handling 176+ distinct client profiles, managing branding, bundle identifiers, feature flags, and environment configurations dynamically without creating unmaintainable code forks. CI/CD & DevOps Automation: Architected zero-touch deployment pipelines using GitHub Actions, Fastlane, and custom Python/Bash scripts to fully automate tenant setup, Apple multi-account signing, and store deployments, drastically reducing release lifecycles. Advanced Mobile Security: Fortified application integrity by implementing custom SPKI SSL certificate pinning, freeRASP/Talsec runtime threat detection, secure token storage, cleartext blocking, and root/jailbreak prevention mechanisms.	

- **Real-Time & Offline Capabilities:** Designed real-time AI features using WebSockets (Laravel Reverb) for interactive streaming, alongside a resilient Hive-based offline synchronization system with an in-app HTTP server for offline HLS video playback.
- **Media & Complex UI:** Developed advanced media experiences using media_kit and VdoCipher DRM, and built a custom PDF annotation engine using Flutter CustomPainter supporting freehand drawing, vector shapes, and undo/redo history.
- **Ecosystem Integration & OTA Updates:** Implemented Clean Architecture for new modules (AI Assistant, Marketplace), integrated global payment gateways (Paymob, PayPal, Geidea), and leveraged Shorebird for seamless Dart-level OTA patch updates.

Landmark Group | IT Specialist

Nov 2019 – Jun 2020

- Administered Windows server and network environments including domain controllers, file/backup servers, Sophos firewall, endpoint security maintenance, and comprehensive network troubleshooting.

KEY PROJECTS

VClasses Ecosystem (100+ White-Label Apps) | Flutter, LMS, CI/CD, Multi-Tenancy [\[Play Store\]](#) [\[App Store\]](#)
Centralized EdTech & LMS platform powering over 100 live client applications. Fully automated through custom GitHub Actions and Fastlane pipelines for rapid, zero-touch deployment across both iOS and Android stores.

MyPet – Pet Adoption & Marketplace | Flutter, Firebase, Provider, Geolocation [\[Play Store\]](#)
Built a full-featured application for pet adoption and e-commerce. Implemented real-time 1-on-1 chat via Firestore, GPS geocoding for locating nearby pets, secure multi-provider authentication, and seamless Ar/En localization.

Kidora – E-Commerce Platform | Flutter, Shopify Integration, REST APIs [\[Play Store\]](#)
Developed a robust mobile e-commerce application directly integrated with a Shopify backend, featuring dynamic inventory synchronization, responsive UI, and a streamlined mobile shopping experience.

EDUCATION & CERTIFICATIONS

B.Sc. Computer and Information Science, Information Technology | Helwan University (2018) | Grade: Very Good
Graduation Project: AI-powered robotic Tic-Tac-Toe system using Python, OpenCV, Arduino, and robotic arm (Grade: Excellent / A+).

- IBM Cloud Application Developer Mastery Award for Students (2018)
- Huawei Egypt Competition - Cloud Track (2018-2019)
